

## GROUP DESCRIPTION

### Chunhui Liu:

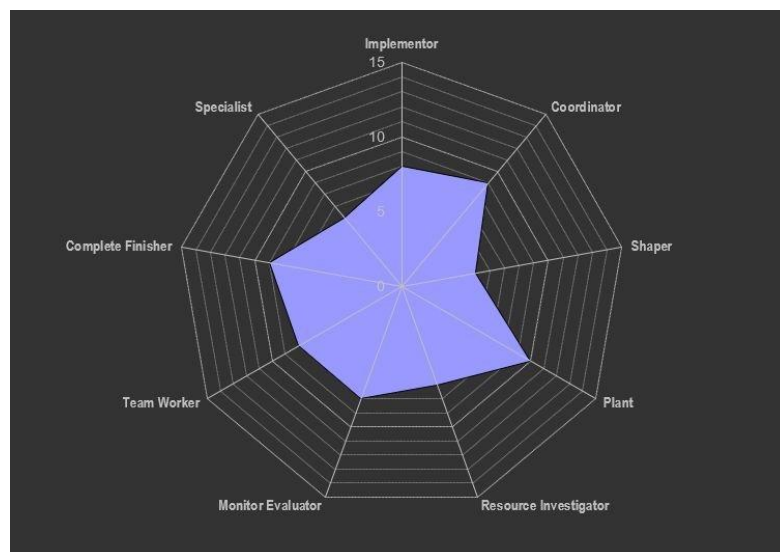

During the internship, I worked in a team of the design and development of QT user interface and the development of 3D game projects. I gained a lot of experience in the actual development of projects. For me, I hope my team members are passionate and willing to communicate, and it is pleasant to work in such an atmosphere.

For my electives this semester I have chosen EOS1, MAL1 and MIX1.

As a team member, my role tends to be a coordinator, plant and complete finisher according to the Balbing roles.

This means that I am a creative character, I like to provide ideas for the team, and I have the ability to rally the team together. I am good at communicating with team members and understand each person's strengths and weaknesses, so as to put forward specific suggestions for each person's work. Which will help us achieve our goals more efficiently.

The test results showed that our team lacked the ability to deal with the outside world and have a strong driving force. As a result, it may be difficult to obtain external information and communicate effectively with supervisors. The lack of Shaper may lead to a decrease in the members' work enthusiasm, and they will be easily discouraged when they encounter setbacks. We will try our best to stay motivated and always encourage each other while doing our job to ensure that this is an active and competitive team.

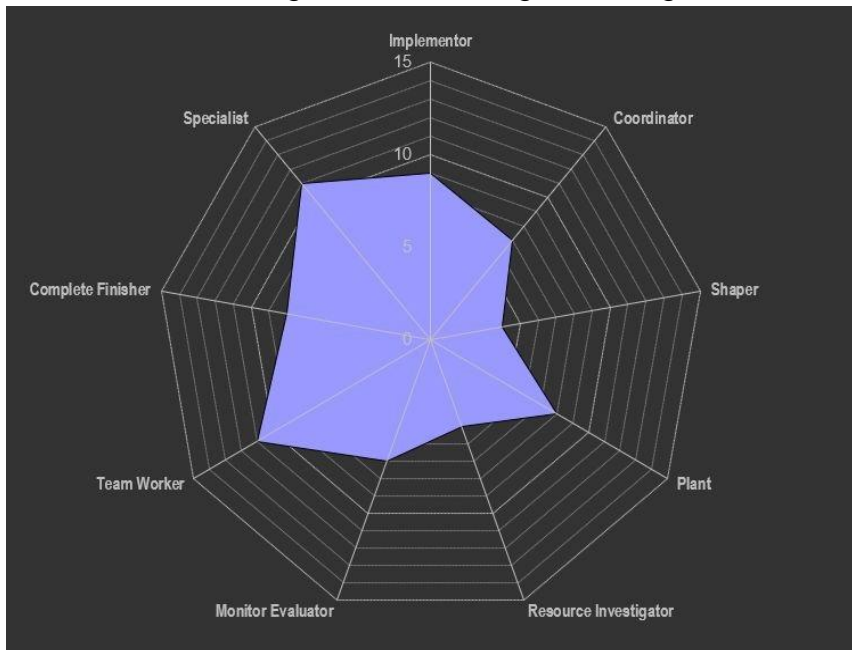

## Ziad Akram Bathish:

I worked as a full-stack developer during my internship, where I had to develop two software using c# and .Net.

I am more interested in interactive media and that is why I picked SWA, IDX, MIX as electives where I would like to work within this area in the future.

According to the Belbin test, I attend to be a team worker and a specialist. This means that I like to work and go in-depth with areas that are important to complete our project.

Where my strengths are to cooperate and listen carefully to team members without any conflicts, and usually I provide good ideas that help to get better results. On the other hand, there are few weaknesses where I often avoid to lead the team because I don't feel that I am good with making critical right decisions.

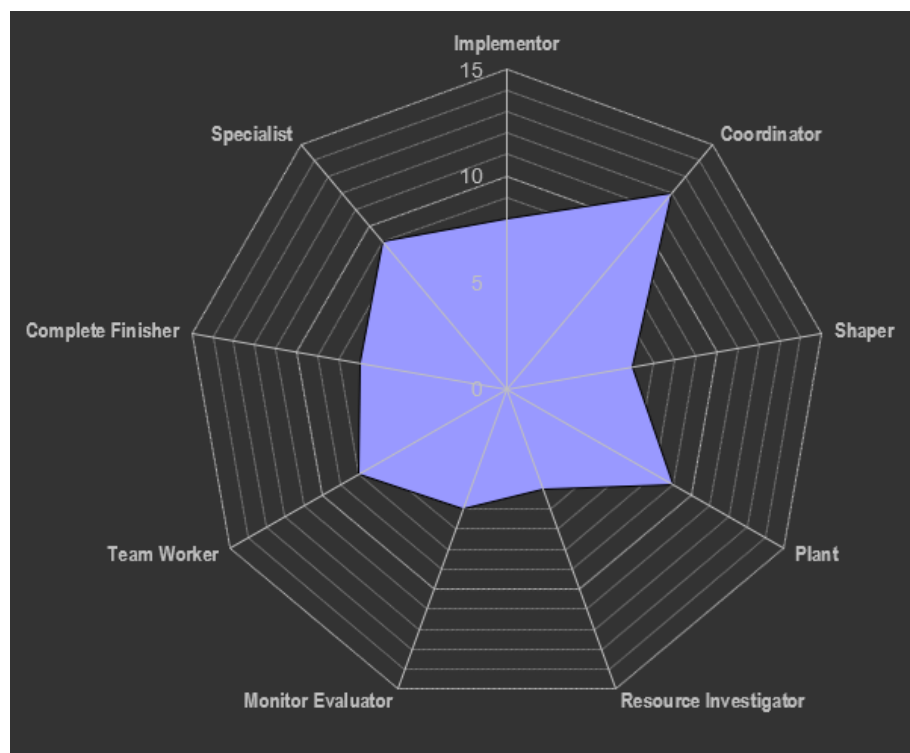

## Angel Iliyanov Petrov:

My practical placement was in the United Kingdom during which, I had the chance to acquire a lot of practical experience about HTML, JavaScript, Ruby and what the atmosphere is when working in an office with very talented people from around the world. My internship placement taught me how to be self-disciplined and how to broaden my horizons in terms of self-development.

Following my internship and return to Denmark, I chose the Interactive Media specialization which includes IDX, MIX and PRM. As I am a visual learner and like to visualize my result very often, I found that the Interactive Media courses will be very pleasing for me to study. My interests are not only limited to Interactive Media and as such I would also like to self-develop myself in other fields in the future after graduation.

According to the Belbin Team roles test which I undertook, my personal character specializes in being a Coordinator, Plant and Specialist. This would imply that I excel in being mature, confident, and able to identify talent within my team as well as putting a clear objective for me and my team to follow towards reaching our success goal. Thanks to my Plant personality trait, I am able to offer high creativity and good problem-solving skills to my team whilst also contributing in-depth knowledge of a key area to the team thanks to my Specialist personality trait.

Comparing each group member's strengths and weakness: We found out that we could help each other while Liu has a good ability to focus on the project goals in general but not deeper, and Ziad has a good ability to provide ideas about how to achieve these goals where Ziad has a weakness with leading from the front. Angel compliments the team with his leadership skills in order to lead the project in the right direction.

On the other hand, Liu focuses more on team communication and generating ideas to solve difficult problems that can be useful to have a motivated, collaborative team, while Ziad is a good listener, diplomatic and provides specialist skills that can help with having good results in the end. Angel is able to provide in-depth knowledge on the team's common ideas and goals.

## Group Contract

Group Name (optional):

Date: 14-09-20

---

These are the terms of group conduct and cooperation that we agree on as a team.

### Participation

- Project decisions will be made after a long conversation where all points of the project should be discussed.
- The decision will be made depending on the experience of team members where we got different knowledge during the internship.
- Tasks can be distributed depending on the field of knowledge of each member and after finishing each task there will be a small discussion, then all members have the same level of understanding.

### Communication

- Communication will be through WhatsApp, Zoom or Microsoft Teams meeting.

### Meetings

- All members have to participate in all meetings. If one doesn't have time, must explain in advance.
- Most of the meetings will be held physically, according to current circumstances there will be few meetings online.

### Conduct

- All members will be open to constructive criticism and solve disputes by vote.

### Conflict

- Conflicts should be solved with supervisors by mail or zoom meeting, in case it could not be solved by a discussion between team members.

### Consequences

- Whoever breaks the rules three times should provide an explanation in the documentation of why.

## Deadlines

- All the deadlines should be respected. We agree to finish the assignments needed at least 24 hours before the deadline.
